1. Overview

The FWU Nagarik API provides programmatic access to Far Western University's student database. This document describes how the **Nagarik App** mobile application can integrate with the **Student Verify** and **Student Transcript PDF** endpoints.

Property	Value
Base URL	https://emis.fwu.edu.np
Swagger UI	https://emis.fwu.edu.np/docs
Protocol	HTTPS (required)
Response Format	JSON (Verify) / PDF Binary (Transcript)
Authentication	API Key (via X-Api-Key header)

Key Endpoints

Method	Endpoint	Auth Required	Response	Description
GET	/api/student/verify	Yes (API Key)	JSON	Verify student by registration number and DOB
GET	/api/student/transcript	Yes (API Key)	PDF	Retrieve student transcript as a downloadable PDF

Verify Endpoint Response (JSON)

```
{
  "data": "7401001",
  "message": "Success",
  "otherData": [
    {
      "regdNo": "7401001",
      "firstName": "Ram",
      "middleName": "Bahadur",
      "lastName": "Thapa",
      "dobAD": "2058-04-15",
      "programName": "B.Sc. Computer Science",
      "intakeYear": "2078",
      "studentStatus": "Active",
      "level": "Bachelor",
      "school": "Central Department of Computer Science",
      "cgpaScore": 3.45,
      "graduateYear": "2082"
    }
  ]
}
```

Transcript Endpoint Response (PDF Binary)

Property	Value
Content-Type	application/pdf
Content-Disposition	attachment; filename="{registration_number}_Transcript.pdf"
Body	Binary PDF (A4 format)

2. Response Field Reference

Verify Endpoint

Field	Type	Description
data	string	Registration number (echoed back)
message	string	Status message (Success or error description)
otherData	array	Array of student records matching the query

Student Data Fields

Field	Type	Description	Example
regdNo	string	FWU registration number	"7401001"
firstName	string	Student's first name	"Ram"

Field	Type	Description	Example
middleName	string	Student's middle name	"Bahadur"
lastName	string	Student's last name	"Thapa"
dobAD	string	Date of birth (Nepali calendar)	"2058-04-15"
programName	string	Enrolled program name	"B.Sc. Computer Science"
intakeYear	string	Year of admission (Nepali calendar)	"2078"
studentStatus	string	Current status	"Active", "Graduated", "Discontinued"
level	string	Study level	"Bachelor", "Master", "PhD"
school	string	School/department name	"Central Department of Computer Science"
cgpaScore	number	CGPA score (null if not applicable)	3.45
graduateYear	string	Graduation year (null if not graduated)	"2082"

Transcript Endpoint

The transcript endpoint returns a **raw PDF binary**, not JSON. The PDF contains:

Section	Content
Header	University name, office name, location
Student Info	Name, registration number, faculty, program, campus
Semester Tables	Subject codes, names, credit hours, grades, grade points
Summary	Total credit hours, total grade points, CGPA
Footer	Issue date, serial number

3. Error Handling

HTTP Status Codes

Status	Meaning	Action
200 OK	Success	Verify: process otherData /

Status	Meaning	Action
400 Bad Request	Missing required parameter	Transcript: save PDF bytes Check registration_number and dobAD are provided
401 Unauthorized	Authentication failed	Verify your API key is valid and active
404 Not Found	No student record matches	Verify the registration number and DOB are correct
500 Internal Server Error	Server-side error	Retry after a brief delay; contact FWU support if persistent

Common Error Messages

Message	Cause	Resolution
"registration_number is required"	Missing registration_number query parameter	Include registration_number in the request URL
"dobAD is required"	Missing dobAD query parameter	Include dobAD in the request URL
"No record found for the given registration number / DOB"	No matching student in database	Double-check registration number and date of birth
"Invalid API key."	Missing or unrecognized API key in header	Include a valid X-API-Key header
"API key has expired."	The API key has passed its expiry date	Contact FWU to obtain a new key

4. Security Notes

Item	Requirement
API Key	Keep confidential. Do not expose in client-side code, logs, or public repositories. Store securely in app keychain/keystore.
HTTPS	All API calls must use HTTPS. HTTP requests will be rejected.
Audit Trail	All API requests are logged for security and compliance. Includes: timestamp, client IP, endpoint accessed, and verification result.
Key Rotation	Contact FWU to rotate your API key if compromise is suspected.

Item	Requirement
PDF Caching	Consider caching PDFs locally with a TTL to reduce redundant API calls.
Rate Limiting	Be mindful of request volume. Cache verify results where appropriate.

5. Support & Contacts

Role	Contact
Technical Support	Prakash Bdr Saud, IT Section FWU, prakesh@fwu.edu.np 9841563644
API Issues	Bishnu Rawal: 9851345885, Jagdish Bhatta: 9841563644
